

HAGON WHEEL SERVICES

CLASSIC WHEELS

Hagon Products Ltd, one of the leading wheel specialists in the UK. We have been building wheels for classic and modern machines since 1958. So whether you require a super-moto conversion for your modern trail bike or a rebuild for your classic we can provide a service that we consider to be second to none.

We stock a large range of rims in British Chrome, stainless and aluminium. These are generally stocked undrilled so when we supply a rim for your machine it is then drilled to the specific hub specification you require. For spokes & rims please refer to our ordering guide, for spoke sets we may require patterns.
